

DIGITAL LUDO

ESP32 LED Board · Quick Start Guide

PLAYERS & BUTTONS

STARTING THE GAME

- 1 Power on** Board lights up in all 4 colours. OLED shows LUDO / Press Join.
- 2 Join** Each player presses their own button to register. Minimum 2 players needed.
- 3 Lock & start** Any joined player presses their button again to lock player selection and start the game.

TAKING A TURN

- 1 Roll** OLED shows your name + Roll Dice. Press your button to roll.
- 2 Pick** Your tokens blink at different speeds. Button 1 = Token 1, Button 2 = Token 2, and so on. to Press pick while it is your turn.
- 3 Move** Token slides the exact steps rolled. Turn passes unless you rolled a 6.

TELLING YOUR TOKENS APART — blinks only during your turn

KEY RULES

- Roll a 6 to enter.** Only a 6 brings a token out of base.
- 6 = roll again.** Three 6s in a row cancels your turn.
- Safe spots.** Tokens on safe spots cannot be killed.
- Kill.** Land on an opponent to send them back to base.
- Home lane.** After a full lap the token auto-enters its home lane.
- Finish exactly.** Must reach the last home LED exactly — overshooting is invalid.
- Win.** First to home all 4 tokens wins. Board flashes your colour!
